

Vancomycin RCP comment template:

Recommend **continuing/increasing/decreasing** dose **[insert dosing here]**

- **Achieving/Not achieving** AUC target (400-600)
- Take a random vancomycin concentration on **[date]** anytime 1 hour after end of infusion

If the patients renal function changes before the next concentration is due, ring your clinical pharmacist for advice. On-call pharmacists are available after hours via switchboard.
